Simply beautiful! Get rid of skin lesions with lasers from A.R.C.

This subcutaneous laser treatment can also be used at the arms or under the chin. Even lipoedema can be visible reduced.

The focus-handpieces are available in 3 different spot sizes: Ø 0.6 / 1.2 / 0.25 mm (red/green/blue - 300 micron).

Treatment of vein diseases by means of endo vascular laser coagulation.

Diode laser FOX with up to 12 W at the laser port

Laser assisted lipolysis is used for gentle destruction of the adipose deposits.

The portable FOX is ideal for outpatient procedures with remarkable results:

SUPERFICIAL CORRECTIONS
- Laser-Coagulation
- Seals veins off
- Small surgical procedures with our sapphire scalpel

LASER-LIPOLYSE
- Reduction of fat deposits
- Smoothing the skin
- Cellulite treatment
- Skin tightening
- Contouring of the treatment area
